

EXCEPTIONAL PERFORMANCE, LONG LASTING & DURABLE

Infinity Belting Ltd.'s Primary Finger Scraper has been designed to keep you running by eliminating carry back on the surface of your conveyor belt. The Primary Finger Scraper can be used in applications such as Aggregate, Bio-Mass, Forestry & anywhere that Bulk Handling Conveyor systems exist.

FEATURES AND BENEFITS:

- Patented Finger Paddles™ flex and conform to the belt surface ensuring adaptable surface contact without excessive pressure having to be applied.
- The patented flexing, flicking action of the Fingers Paddles provide longer dwell time on the belt to ensure superior cleaning.
- Primary Scrapers work on smooth and cleated belts, reversing conveyors, cold bonded or hot vulcanized splices, belts with mechanical fasteners and belts with mechanical patch repairs.
- Engineered, compact design enables successful installation in restricted, tight locations within your conveyor system.
- Rock solid construction will give long term service in many applications.
