

HEAVY DUTY DOUBLE ROW SCRAPER

IBL-TBCUB-HD

EXCEPTIONAL PERFORMANCE, LONG LASTING & DURABLE

Infinity Belting Ltd's Heavy Duty Double Row Scraper has been designed to keep you running by eliminating material build up on the Conveyor Belt surface. The Heavy Duty Double Row Scraper can be used in applications such as Agricultural, Bio-Mass, Forestry & anywhere that Bulk Handling Conveyor Systems exist.

FEATURES AND BENEFITS:

- Patented Finger Scraper™ paddles flex and conform to the conveyor belt surface ensuring adaptable surface contact without excessive pressure having to be applied.
- The patented flexing, flicking action of the Finger Scraper™ paddles provide longer dwell time on the conveyor belt surface to ensure superior cleaning.
- Heavy Duty Double Row Scrapers are available in lengths designed to suit your conveyor belt and its framing and is especially suited for belt widths over 56 inches.
- Engineered, compact design enables successful installation in restricted, tight locations within your conveyor system.
- Rock solid ASTM A36 steel construction will give long term service in many applications.
