

## EXCEPTIONAL PERFORMANCE, LONG LASTING & DURABLE

Infinity Belting Ltd.'s Pulley Cleaner has been designed to keep you running by eliminating material build up on the Pulley. The Pulley Cleaner can be used in applications such as Agricultural, Bio-Mass, Forestry & anywhere that Bulk Handling Conveyor systems exist.

## FEATURES AND BENEFITS:

- Patented Finger Scraper™ paddles flex and conform to the pulley lagging ensuring adaptable surface contact without excessive pressure having to be applied.
- The patented flexing, flicking action of the Finger Scraper™ paddles provide longer dwell time on the pulley surface to ensure superior cleaning.
- Pulley cleaners can be installed on any diameter pulley with any style lagging.
- Rudimentary, compact design enables successful installation in restricted, tight locations within your conveyor system.
- Rock solid ASTM A36 construction will give long term service in many applications.
